Frontend and Full Stack Developer with hands-on experience building production-grade React.js applications, enterprise HR automation platforms, and AI-powered workflow tools. Skilled in React.js, JavaScript/TypeScript, Python, Tailwind CSS, Streamlit, Java Spring Boot, and Microservices. Proficient with modern AI tools including OpenAI API, n8n, Cursor, and GitHub Copilot. Proven track record delivering startup ecosystems, multi-country payroll automation, and recruiter-grade portfolio projects. Strong background in UI animation, responsive design, and API integration.

WORK EXPERIENCE

Frontend Developer & Python Automation

01/2026 – Present

EMPRIO Startup (Freelance)

Remote

- Engineered a high-performance startup marketing platform from the ground up using React.js, Vite, and Tailwind CSS, achieving a 95+ Lighthouse performance score.
- Architected a scalable multi-page frontend with reusable component structures and route-based navigation, reducing future feature development time by 20%.
- Implemented Framer Motion animations, dark mode toggles, and seamless page transitions to drive user engagement across desktop, tablet, and mobile.
- Delivered a fully responsive, mobile-first experience with 100% layout consistency and cross-browser compatibility.
- Collaborated directly with founders to translate branding requirements into intuitive user flows and a streamlined design-to-deployment pipeline.
- Integrated OpenAI API and n8n automation workflows for internal business process automation and lead management.

Team Leader – Technology Projects

10/2024 – 05/2025

Cyfuture

Noida

- Spearheaded cross-functional teams across multiple high-impact client projects, ensuring 100% alignment with project milestones and technical specifications.
- Optimized project workflows through structured task delegation and real-time coordination, significantly reducing development bottlenecks.
- Directed end-to-end quality assurance processes, maintaining a high standard for production-ready code within strict client timelines.
- Facilitated stakeholder communication to bridge the gap between technical teams and client requirements.

Junior Mechanical Engineer

05/2021 – 07/2023

Nikon Survey engineering Pvt limited

Delhi

- Managed equipment setup and pneumatic instrumentation workflows.
- Coordinated client requirements and resolved technical issues efficiently.

PROJECTS

EMPRIO Marketing Platform | 01/2026 – Present

- Built a fast, modern marketing agency website with React.js and Vite, designed to showcase services, generate leads, and strengthen brand presence online.
- Implemented Framer Motion animations, dark mode, responsive layouts, and router-based navigation achieving 95+ Lighthouse performance score.

Tech: React.js, Vite, Tailwind CSS, Framer Motion, JavaScript

Enterprise HR Operations Platform | 2025 – 2026

- Built a Streamlit-powered enterprise HR platform covering payroll reconciliation, cost reporting, headcount analytics, variance analysis, and E-Banking automation.
- Implemented multi-country payroll operations (Singapore & Indonesia) with forensic reconciliation reporting and automated audit trails.
- Designed a modular architecture with a custom design system (assets/css, components, pages) enabling clean separation of concerns across 7+ functional modules.

Tech: Python, Streamlit, Pandas, REST APIs, CSS

[Personal Portfolio Website](#) | 08/2025 – 09/2025

- Built a premium multi-page portfolio using React.js and Vite with immersive 3D visuals, smooth animations, and responsive layouts.
- Implemented router-based navigation, dark mode, and recruiter-focused UI with clean component architecture deployed on Netlify.

Tech: React.js, Vite, JavaScript, Tailwind CSS, Framer Motion

[Online Cake Ordering System – Cake Palace](#) | 2024

- Full-stack e-commerce app with role-based access (Admin/User), JWT authentication, and secure REST APIs.

Tech: Angular, Spring Boot, MySQL, MongoDB, JWT

[Kanban Board Application](#) | 01/2024 – 02/2024

- Workflow management system for task tracking with real-time task status and role-based team access (admin/member).

Tech: Angular, Spring Boot, MySQL, Java

SKILLS

Frontend: React.js • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Angular • Framer Motion

Backend: Java • Spring Boot • Node.js • REST APIs • Microservices • .NET

Python & AI: Python • Streamlit • OpenAI API • n8n Automation • Pandas • Data Processing

AI Dev Tools: Cursor • GitHub Copilot • Claude (Anthropic) • ChatGPT • Prompt Engineering

Databases: MySQL • MongoDB • JSON

Tools & DevOps: Git • GitHub • Vite • Postman • JUnit • Responsive Design • API Integration

EDUCATION

B.Tech / Engineering — Maharaja Agrasen Institute of Technology, Delhi

Delhi

Class XII & X — Kendriya Vidyalaya Andrew's Ganj, Delhi

Delhi

CERTIFICATIONS & COURSES

Software Engineering Program — NIIT | 08/2023 – 03/2024

Covered: Java, Spring Boot, Angular, React.js, REST APIs, Microservices, MySQL, MongoDB
